

THE DRILLING PRESS

ANYTHING BUT BORING

JEFFREY MACHINE INC
DRIVEN BY PRECISION

WE'RE HEADING TO IFCEE

In March, we will be in sunny Orlando, Florida attending and exhibiting in the International Foundations Congress and Equipment Expo (IFCEE). This show is dedicated to the Deep Foundation Industry and will have attendees from all over the world seeking the newest, most innovative tools, machines and technology. There will also be many workshops and demonstrations throughout the week. We will be showcasing our most popular models of auger and core barrels and will have Sales Reps on hand to talk about how we can create a custom tool for your next project.

The show is March 5-10 at the Hilton Orlando Buena Vista Palace.
Visit us at booths 607, 608, 628, and 629.

SPECIALS END MARCH 31, 2018.

EMPLOYEE SPOTLIGHT: MEET MATT DIFFY

Matt Diffy began working at Jeffrey Machine in 2008 and has been a machinist since 2000. He started out in a small local shop with his Father making small machined parts on manual machines. A couple of years later he began running CNC's, making parts for the steel and mining industry. Matt has been married to his wife, Amy, for 13 years and they have 2 daughters ages 13 and 5.

How did you first learn about Jeffrey Machine?

I heard Jeffrey Machine was looking for a Machinist from a friend that is in the Machine Tool business. I gave them a call and setup an interview; upon meeting everyone here I knew that Jeffrey Machine was somewhere I wanted to be.

What do you like most about Jeffrey Machine?

There is a lot that I could say because Jeffrey Machine is unlike any other employer I have EVER worked for. But, if I have to pick one specific thing, it would be working for someone that genuinely cares about you and your family.

What is the most challenging part about Jeffrey Machine?

The most challenging part about Jeffrey Machine, for me, is the customization and personal touch that is put into each customer's tools. But a challenge like that is really something that makes the workday more enjoyable.

How has the company changed since you first started?

To me, the main changes that have happened since starting at Jeffrey Machine is the new equipment that has been added in the Machine Shop and the amount of parts/components that are manufactured in house.

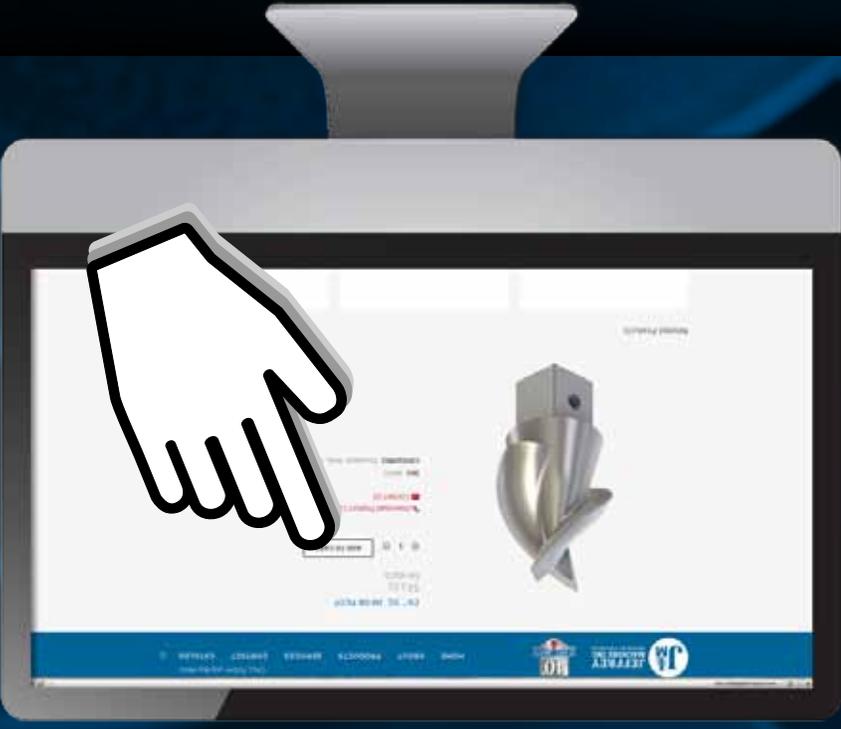

What is your proudest moment at Jeffrey Machine?

My proudest moment at Jeffrey Machine would have to be the day I was hired. Working for people like Frank Sager and Jeff Sager has been great. Knowing that I work for a company that actually knows your name and listens to your ideas is something, to me, to be proud of.

What do you hope the future brings for Jeffrey Machine?

My hope for Jeffrey Machine in the future is to continue to grow and be successful for many years to come.
